EDUCATION

FAST NUCES

Bachelor in Computer Science

- CGPA: 3.70
- Silver Medal in Fall'21 Semester
- Dean's List of Honour in every semester for 3.5+ SGPA

Islamabad, Pakistan

Aug. 2020 – Aug. 2024

EXPERIENCE

Software Development Engineer

Veeam Software

- Worked on integration of backup and snapshot policies into product
- Worked on ingestion of Veeam backup systems audit and event logs into our UI system
- Helped in development of new threat detection framework and ingestion of threat logs from Veeam product side

Dec 2025 – Present

Islamabad, Pakistan

Software Development Engineer

Securiti.ai

- Integration for data access control of ranger based systems like Apache Trino, Presto and Starburst
- Worked with Quarantine team to improve flow of operations and reduce time of completion
- Revamped Data Labeling Policy flow to a newer better approach which reduced processing time for our customers

July 2025 – Dec 2025

Islamabad, Pakistan

Associate Software Development Engineer

Securiti.ai

- Part of Back End Data Access Control Policy Team
- Helped develop and maintain features related to data access governance over systems like Sharepoint, Databricks, Snowflake
- Developed Backup and Restore feature for Databricks and Snowflake Access Policies

Jun 2024 – July 2025

Islamabad, Pakistan

TECHNICAL SKILLS

Languages: Python, Golang, SQL, JavaScript

Frameworks: React Native, Node.js, Express.js, Tensorflow, Keras, Mediapipe

Developer Tools: Docker, Kubernetes, Helm, AWS, Claude Code

PROJECTS

Move | *Mediapipe, FastAPI, OpenCV, React Native, Supabase, Firebase*

Sept 2023 – May 2024

- Mobile Fitness Application to assist with form while performing exercises
- Pose estimation algorithm used to compare postures between client and trainer
- Errors pointed out and feedback provided to client to fix posture

What On Earth | *Java, Firebase, Android Studio*

Nov 2022 – Dec 2022

- Android Application based game related to climate protection, awareness and how people's actions affect it
- User has to make choices on certain problems of the world and according to the choice made, different stats are updated. Game carries on until Earth becomes uninhabitable
- These stats include climatic stats like biodiversity, population count and the currency (coins)

Web Scraping Project | *Python, NetworkX, NLTK, Matplotlib*

Nov 2021 – Dec 2021

- Console based application that collected scraped text from webpages of universities in Pakistan (NUST, FAST and LUMS) and classified text into nouns, verbs and adjectives. These were then plotted for comparison
- Made a graph of all the nouns using NetworkX and list top 10 nouns listed along with the count of how many there are

CERTIFICATIONS

Deep Learning Specialization | *Deeplearning.AI*

Dec 2024 – Feb 2025

Machine Learning Specialization | *Deeplearning.AI*

June 2023 – July 2023

Docker and Kubernetes | *Udemy*

Sep 2024 – Oct 2024

SQL - The Complete Developer's Guide (MySQL, PostgreSQL) | *Udemy*

Nov 2024 – Dec 2024
